PRODUCE

A specialist in cut and sewn stitching

■ Our sourcing aims at performance, flexibility and price

■ For more flexibility and efficiency, GilClaude offers you three complementary production areas in the Mediterranean :

The most sophisticated models (Turkey), the "large volume" products at low cost (Egypt), and "actua" (Tunisia), products with european materials (prints-fancy goods).

■ Our fabrics are knitted in the country where they are produced in mixed cotton and viscose sometimes with elasthane, plain or dyed weave. They are imported from Asia for polyester (polar, micro polar).

■ All those involved in the trade are certified or approved for their level of quality.

■ GilClaude uses more than six hundred tonnes of stitching per year for a production of 200,000 articles per month.

DEVELOP, INNOVATE, INVEST, SATISFY

A culture of perfection and continuity

■ Created nearly fifty years ago, GilClaude, manufacturer from Marseille, innovates, invests and organizes constantly to offer you services and products both diversified and impressive, from the long-term to just-in-time (supply 1 for 1).

■ In this permanent evolution, our next step is our very own digital photo studio, followed

by a teleconference studio.

■ Today, GilClaude is recognized for its genuine textile know-how, its demanding performance and its passion for excellence, is exported internationally.

Look us up, and together let's discover our hallmark of appeal.

SITUATION

Perfectly adjusted logistics.

Marseille with its privileged situation in the heart of Europe, benefits not only from the ideal position for its expansion, but also from the availability of an important communication network (road, rail, sea and air infrastructures).
